NOTES

Export

• For those who are generating electricity on their premises and exporting some or all of this into Electra's distribution network.

Price Discount 2026

- Electra's Discount for 2025 will be paid to Qualifying Customers as at 31 January 2026.
- The Discount consists of a fixed and variable component and will be passed through on the bill you receive from your retailer.
- The fixed component will be \$0.1370 per day and variable component will be \$0.0073 per kWh.
- The post discount prices are outlined in the Pricing Schedule.

Power Factor Premium

• This applies to commercial customers. Where the power factor is less than 0.95 Electra reserves the right to impose a power factor premium. The premium will be based on a multiplier of 2% of the monthly total Network price for every 0.01 power factor below 0.95 lagging.

Individual Price Option

• An Individual price option (IND) is available for customers on pricing trials or who are deemed by Electra to require customised pricing. Prices are available on request.

Loss Factor Code	1
Network Losses (%)	6.60%
Loss Factor	1.071
